

Voltas Water Solutions

Water ATM

A smart way to get purified drinking water with just a coin

The Water ATM is a fully automatic machine which can produce high quality drinking water. Once connected to water and power supply, it can purify any water into healthy water which can meet National drinking water standards through its inbuilt high technology devices like Reverse Osmosis (RO) and sterilization system. This product is ideal for public places such as railway stations, bus stands, malls, amusement parks and even Kumbh Melas, regional markets (haats) etc.
